of Maryland

United States Senator

WASHINGTON — Senate Committee Reports On Cuba — The Preparedness Investigating Subcommittee of the Senate Armed Services Committee, headed by Senator John Stennis, has made public its unanimous report on Cuba. To get the answers to some vital questions, the Senate Committee summoned top officials of the CIA and the Pentagon and questioned them at length. The committee's official report is eye-opening. It cites evidence that the Soviets are merely rotating their forces in Cuba, with at least as many coming in as going out. The report calls for drastic and immediate action.

Summarizing the danger posed by the Soviet presence in Cuba, the Investigating Subcommittee listed a number of points, including the following: (1) "Cuba is an advanced Soviet base for subversive revolutionary and agitational activities in the Western Hemisphere and affords the opportunity to export agents, funds,

arms, ammunition and propaganda throughout Latin America." (2) "Assuming, without deciding, that all strategic weapons have been withdrawn, there is the ever-present possibility of the stealthy reintroduction of strategic missiles and other offensive weapons." (3) "Cuba serves as an advanced intelligence base for the U.S.S.R." (4) "Potentially, Cuba is a base from which the Soviets could interdict our vital air and sea lanes. It can now be used for the air, sea and electronic surveillance of our military activities in the Southeast United States and the Caribbean." (5) "Advanced Soviet submarine bases could be established in Cuban ports with very little effort." (6) "The very presence of the Soviets in Cuba affects adversely our nation's image and prestige. Our friends abroad will understandably doubt our ability to meet and defeat the forces of Communism thousands of miles across the ocean if we prove unable to cope with the Communist threat at our very doorstep."
